PLASTER DISPENSER COMPARISON

Plaster dispensers are increasingly used in large companies and workplaces with an increased risk of injury. In an emergency, they provide a central point of contact that promises quick help for minor cuts and wound injuries. Since the focus in such situations should be on rapid and effective wound care, plaster dispensers are usu-

ally designed to be easy and uncomplicated to use one-handedly. Nevertheless, there are differences between manufacturers, which ultimately affect handling and use in the workplace. The following comparison table provides you with a quick overview and helps you choose a suitable plaster dispenser for your business.

	EASYAID ACTIOMEDIC	QUICKFIX PLUM	SALVEQUICK CEDERROTH
